

## Maximize Your Outdoor Living Space!

### Features

- Vinyl construction
- Snap-together panel design
- 10 year limited warranty

### Benefits

- Maintenance free, all weather protection
- Easy installation under any raised deck
- Beautiful and dry outdoor living space

**DrySnap** is an under deck rain carrying system designed to maximize outdoor living space. Installed beneath residential and light commercial decking, this system adds value to any home by providing a dry, useful area... screened porch, storage area for lawn equipment or bikes, etc.

It's maintenance free vinyl ceiling panels collect and drain water away from the space beneath the deck. The system comes complete with a ten year product warranty.

Installation of the DrySnap system is easy. Its five components snap together for maximum efficiency and cost savings.

# The 5-component System

## Installs in a Snap!

### It's Easy to Install

The real beauty of the DrySnap Under Deck Rain Carrying System lies in its simplicity. It has only 5 components and is installed in a three-step process.

#### Step #1

Screw joist brackets with pitch spacers attached into joist.

#### Step #2

Snap starter channel to joist bracket.

#### Step #3

Snap panels into place and finish with trim cap

The DrySnap system is an easy way to create a great outdoor space under residential and light commercial decking.\*
